PROFESSIONAL SUMMARY

Backend / Fullstack-focused developer with hands-on experience building internal tools, enterprise web applications, and automation systems using Node.js, Laravel, React, and SQL Server. Experienced in REST API integration, JWT authentication, SAP API integration, and system troubleshooting. Comfortable working independently in remote environments and contributing to scalable web applications.

CORE SKILLS

- Backend development: Node.js services, Laravel (PHP), REST API integration, JWT authentication, JSON processing
- Database: SQL (SQL Server), queries, reporting, basic optimization
- Automation: Puppeteer (web automation), Appium (Android automation testing), RPA for internal workflows
- Observability & troubleshooting: Dynatrace monitoring, Windows Event Viewer, Linux system logs
- Tools & Platforms: Git, Windows/Linux/macOS environments

WORK EXPERIENCE

Software & Automation Developer — PT Astra Otoparts Tbk | 2024 – Present

- Develop internal tools and enterprise web applications using Node.js, Laravel, and Next.js integrated with SQL Server and SAP APIs.
- Implement JWT authentication and role-based access control for secure system access.
- Build interactive business modules, including event management and doorprize systems with fair randomization logic.
- Develop web automation (Puppeteer) and mobile automation testing solutions (Appium – Android) to reduce manual operational workload.
- Integrate internal/external services via REST APIs and handle JSON-based data processing.
- Troubleshoot and resolve application issues using logs and monitoring tools.

IT Support (2nd-Level) — PT Astra Otoparts Tbk | 2023 – 2024

- Provided 2nd-level IT support for internal users across multiple departments.
- Resolved hardware and software incidents, including OS, network connectivity, and application-related issues.
- Analyzed system and application logs (Windows and Linux) to identify root causes and prevent recurring incidents.
- Supported internal systems and coordinated with vendors or senior engineers for complex technical issues.
- Tracked incidents and service requests in Ivanti according to SLA and documented resolutions.

DevOps Intern — Pasaryoo App | 2020 – 2021

- Monitored backend services and application performance to support a stable SaaS environment.

- Investigated production issues using logs and monitoring tools, escalating findings to engineering teams.
- Assisted frontend and backend teams with environment setup, deployment support, and basic troubleshooting.
- Contributed to documentation of deployment steps and system behavior for operational clarity.

EDUCATION

Bachelor of Informatics (S1 Informatika) — Telkom University | 2014 – 2020

Final Project: Data Collection System for Rainfall, Humidity, and Temperature in the Telkom University Campus Area as a Basis for Revalidating the Weather Research and Forecasting (WRF) Simulation Device.

Key Subjects: Web Programming, Software Engineering, Sensor Integration, IoT Systems.

TECHNICAL SKILLS

- **Programming:** JavaScript (Node.js), basic frontend development
- **Backend & APIs:** Node.js, RESTful API integration, JSON
- **Databases:** SQL (queries, reporting, basic optimization)
- **Monitoring & Logs:** Dynatrace, Windows Event Viewer, Linux system logs
- **Automation:** Puppeteer (web automation), Appium (Android automation testing), RPA for internal workflows
- **Ticketing:** Ivanti (incident & request management)
- **Operating Systems:** Windows, Linux, macOS
- **Version Control:** Git

LANGUAGES

Indonesian (Native) | English (Written: Basic, Spoken: Conversational)

CERTIFICATIONS

Fullstack Node.js Bootcamp — Certificate Code ID.
